Dear Hiring Manager,

I am writing to express my interest in a Software Engineering internship or junior role at your organisation. I am currently enrolled at WeThinkCode_, where I am pursuing a Software Engineering programme with a focus on object-oriented design, systems thinking, and practical software development. With a strong academic background in Applied Mathematics and hands-on experience across multiple technologies and industries, I am eager to bring both technical skill and a problem-solving mindset to a forward-thinking engineering team.

Throughout my studies and freelance work, I have developed practical proficiency in Java, Python, JavaScript, HTML, and CSS, as well as experience with tools and platforms such as Firebase, FastAPI, PostgreSQL, and Vercel. One of my most recent projects involved designing and deploying a full e-commerce web application for a local awards business, built from the ground up using vanilla JavaScript and Firebase, and successfully delivered to a live production environment. This project sharpened my ability to translate real-world client requirements into a functioning digital product — a skill I believe is central to effective software engineering.

Beyond my technical abilities, I bring a multidisciplinary perspective shaped by my background in applied mathematics, graphic design, and client-facing roles in sales and telecommunications. This combination allows me to approach engineering problems not only with code, but with a clear understanding of business context, user experience, and communication. As a Peer Tutor at WeThinkCode_, I have also strengthened my ability to explain complex concepts clearly and contribute to a collaborative learning environment — qualities I look forward to carrying into a professional engineering setting.

I am a motivated, detail-oriented individual who takes pride in writing clean, purposeful code and delivering quality work. I am particularly drawn to opportunities that challenge me to grow, contribute meaningfully to a team, and apply my skills to real problems. I would welcome the opportunity to discuss how my background and ambitions align with the needs of your organisation.

Thank you for your time and consideration. I look forward to hearing from you.

Yours sincerely,

Kabelo Bongani Maile
